

KYLA G. CHUA

N. Roque, Bulan, Sorsogon
09924568299 | chuakyla21@gmail.com

PROFESSIONAL SUMMARY

A dedicated fourth-year Bachelor of Science in Information Technology student, majoring in Web Development, at Sorsogon State University, seeking an On-the-Job Training (OJT) opportunity in Business Analysis/Quality Assurance (QA) opportunity to apply the knowledge and skills gained through academic projects and hands-on development activities. Interested in gaining real-world experience, exploring different areas of the IT industry, and improving both technical and problem-solving skills. Willing to take on new challenges, learn from experienced professionals, and contribute to a team.

EDUCATION

Sorsogon State University – Bulan Campus

Bachelor of Science in Information Technology, Major in Web Development | Expected Graduation: 2027

TECHNICAL SKILLS

Programming Languages: HTML, CSS, JavaScript, TypeScript, PHP, basic SQL
Frontend & UI Libraries: React.js, Next.js (basic), Tailwind CSS, shadcn/ui, Lucide Icons
Backend & Runtime: Laravel (PHP), Node.js, Express.js
Databases & Management Tools: Firebase Firestore, MySQL, phpMyAdmin
Testing & API Tools: Postman (API testing)
System Analysis & Documentation: Requirements analysis, ERD, DFD, workflow diagrams, architecture diagrams, technical documentation
UI/UX & Wireframing Tools: Figma and Balsamiq
Mapping & Geolocation: Leaflet.js, OpenStreetMap, geotagging integration
Development & Collaboration Tools: VS Code, Cursor, Git, GitHub, and Trello
Deployment Platforms: Vercel, Railway, and Render

ACADEMIC PROJECTS & DEVELOPMENT EXPERIENCE

Web-Based Geo-Tagged Reforestation Monitoring System for MENRO | Capstone Project

- Currently developing a capstone project focused on creating a web-based system for managing seedling inventory, planting records, and tree survival monitoring.
- Using React.js for frontend development and Node.js with Express.js for backend functionality.
- Using Firebase Firestore and Firebase Storage to store and manage system records.
- Integrated geotagging and interactive maps using Leaflet.js and OpenStreetMap, and worked on system workflows and technical documentation.
- Used Postman for API testing, tried Playwright on selected features, and worked with Vercel and Render for deployment.

Web Application Development | Academic Projects

- Worked on different web development projects using the Laravel framework and PHP, mainly focusing on backend development and application functionality. Used a MySQL database, Railway for backend deployment, and Postman to test APIs.
- Gained experience in full-stack development by integrating React.js with Laravel in one of the small projects.
- Handled database operations for small web applications and management systems.

Frontend Development, UI/UX & Wireframing Tools | Academic Work

- Created web layouts using Tailwind CSS, shadcn/ui, and Lucide Icons, and used Figma in UI/UX coursework and Balsamiq to create wireframes.
- Project: https://www.figma.com/design/j138yvCXFRO8YYBIfo3Pue/High-Fidelity?node-id=0-1&t=BwmEuWrJ0SW8fAvH-1
